NUVO Sports Journalism Intern: Crit Intern (one per semester/session)

NUVO is looking for talented, detail-oriented, high-energy students who are enthusiastic about the craft of sports journalism, specifically the sport of competitive cycling with a focus on criterium (or “crit”) racing.

This internship is the chance to learn first-hand what it takes to cover a single sport in an “immersive” fashion. As cycling season gets underway in Central Indiana, the top riders will be focused on US Criterium Nationals and IndyCrit in July as well as NUVO’s Mass Ave Criterium in August.

The successful candidate for this internship will have excellent writing and reporting skills and the desire and ability to learn a fairly obscure sport from the “ground up,” sharing the details of events, rules and riders in a compelling fashion that’s easily understood by the most casual of fans.

NUVO’s Crit Intern will report directly to Managing Editor Ed Wenck and Editor-In-Chief/Publisher Kevin McKinney.

Educational meetings will be set up between managers of different departments and the student interns. The intern will also meet with those responsible for the promotion and marketing of the sport. As this internship opportunity will extend over multiple semesters, the intern will be expected to share and communicate their accumulated knowledge with their successor and learn from their predecessor.

Responsibilities of the Crit Interns include but are not limited to: regular online posting including cycling “explainers” (rules, competition structures, etc.), results, recaps and personality profiles. Interns will work with the Managing Editor to aggregate postings into cohesive print pieces. The intern will see both online and print bylines as a result.

This specific internship affords an incredibly unique opportunity to build a portfolio of work to assist them in their postgraduate career search.

Interns will be required to log the hours dictated by IUPUI for accreditation. This internship is non-paid and is for-credit only.

To apply, please contact Ed Wenck: ewenck@nuvo.net
