3/12/19
The Medical Humanities and Health Studies (MHHS) Program offers an interdisciplinary curriculum to prepare undergraduates to understand the broader role and determinants of health and medicine in today’s world. Humanities courses raise questions of how human beings deal with health, medical intervention, illness and death. Social science courses provide insight into the social, economic and cultural contexts of health, illness and health care. Students benefit from the wealth of faculty in Liberal Arts and across the IUPUI campus who have strong teaching and research interests in the area of health care.

An academic foundation in MHHS can be valuable to students pursuing virtually any career path, including but not limited to social/economics research, medicine, allied health professionals, dentistry, health law, medical social work, nursing, public health, and public policy studies. *Our graduates have directly gone on to pursue degrees in pharmacy, medicine, occupational health, other health professions, law school, and other graduate and professional school programs, as well as to relevant career-building employment.*

*students that went on to professional programs completed the required pre-requisites along with the requirements for the MHHS degree.*

The Bachelor of Science degree in Medical Humanities and Health Studies (MHHS) required satisfactory completion of each of the following:

- Required IUPUI General Education Core and School of Liberal Arts Bachelorette Competencies (see pages 1 & 2)
- Completion of a total of 30 credit hours in the MHHS major, with a minimum grade of C in each course
- 21 credits of the MHHS major must be taken at IUPUI (effective fall 2019)

Additional Information about the major requirements for the Bachelor of Science degree in Medical Humanities and Health Studies (MHHS):

- A course may only count in the major once, either as a core course or an elective
- Students may share 2 courses; 6 credits with any other minor or major
